

Andrew Kippley Benefit

Andrew Kippley is a 14 year old boy who is fighting Neuroblastoma cancer for the second time. Andrew was diagnosed when he was two years old and went through a year of intensive chemotherapy. Treatment was thought to be successful and he was called "cured" after two cancer free years. At the age of 14 Andrew relapsed with the same cancer and has now begun to fight it all over again.

Andrew has been through intensive chemotherapy the past two months, which has been ineffective. The tumor is getting bigger and the doctors now feel that chemotherapy is no longer an option so Andrew will undergo surgery to see if they can remove the tumor. We invite you to come out and show your support for Andrew and his family.
